

*Manufacturer of Ultrasonic Cylinder Test Equipment and Modal Acoustic Emission Service Provider*

**FOR IMMEDIATE RELEASE**

(Centennial, CO, USA. January 8, 2009) - DIGITAL WAVE CORPORATION ANNOUNCES NEW WEB PAGE DESIGN.

Digital Wave Corporation ([www.digitalwavecorp.com](http://www.digitalwavecorp.com)) announced today the launch of a new web page. Due to ever expanding interest in company provided advanced ultrasonic cylinder test equipment (UE1™ and UE23™) and modal acoustic emission services, a more navigable web page was required.

Mr. Mark E. Anderson, Director Sales and Marketing at Digital Wave Corporation, is quoted as saying: "We are very excited about this new web page design. The explosive interest we have seen in our modal acoustic emission testing equipment and even greater interest our ultrasonic cylinder inspection equipment (UE1™ and UE23™) necessitated a better flow of information to our customers. You will see that the new page is much more navigable and provides the customer easy links to the specific information they are looking for. I am confident that this will not only be a valuable source for customer information, but will also be a critical tool in maintaining our high level of global customer service."

Digital Wave Corporation is a privately held manufacturer of ultrasonic examination (UE) cylinder testing equipment, modal acoustic emission (AE) testing equipment and a provider of associated inspection services. With applications worldwide, Digital Wave and its partners serve private and governmental clients in the compressed gas, pressure vessel and cylinder industries. The firm's PhD's, engineers, software programmers, field techs and manufacturing staff are ranked with the best in the industry. For more information on our cutting edge technologies, please feel free to contact us at any time.
